

HARDWOOD DOORS

The strength of legendary Guyanese timber. Stately design. Made with Kabukalli and Purple Heart timber, these doors not only provide added security but are also resistant to termites and other elements.

And with our attractive design selection, the only trouble you would have with these doors is choosing. They provide solid value to your home.

METPRO STEEL EDGE DOORS

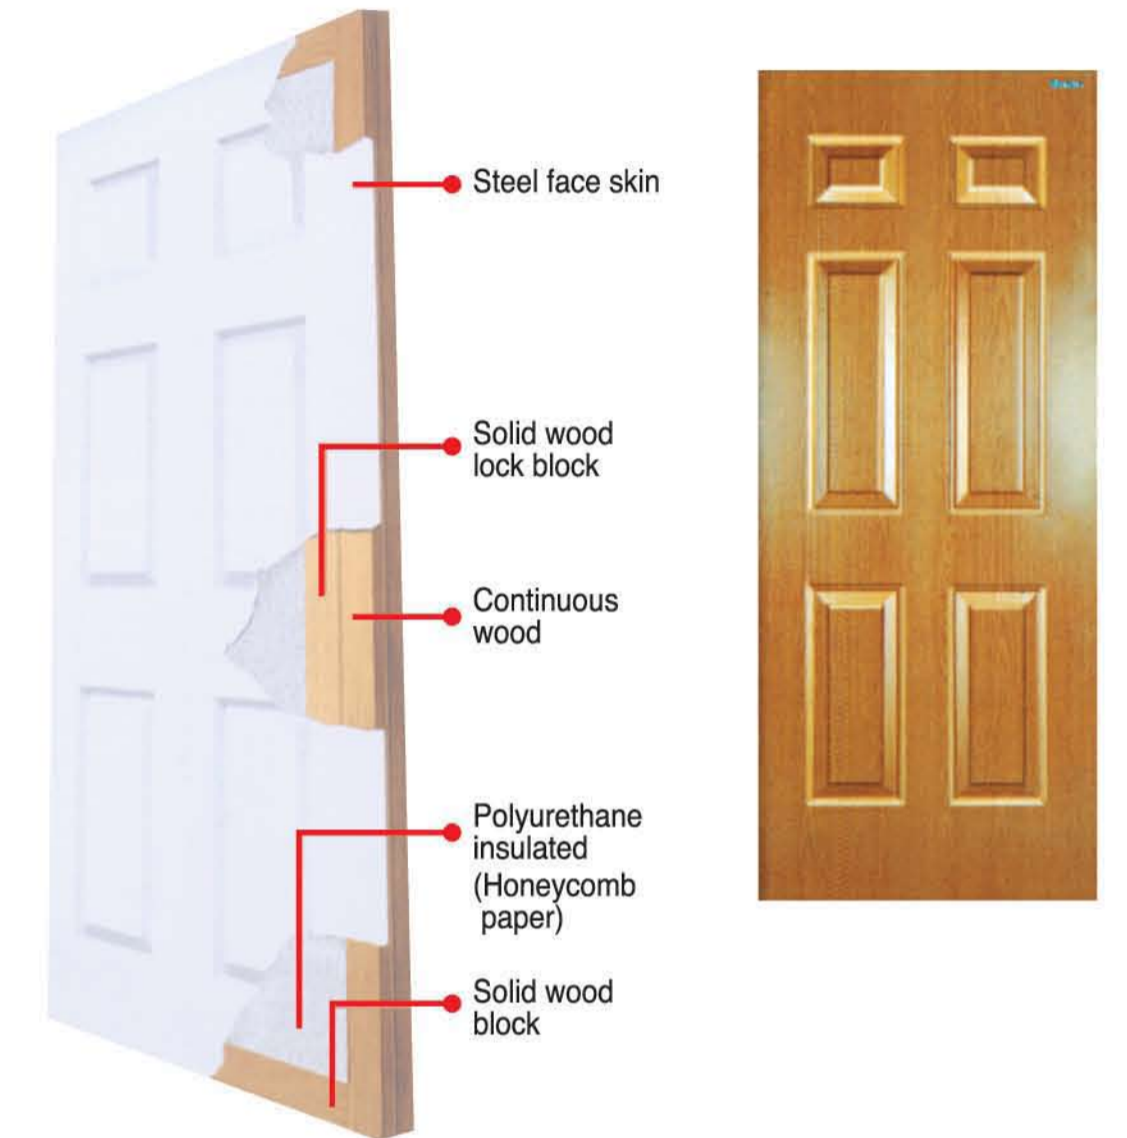

Style and durability await you with these exceptional doors which are perimetered with solid steel rails, laminated with PVC film steel plates and insulated with high density polyurethane or honeycomb core.

All of this ensures that your door is rugged, humidity-resistant and will stay beautiful for years and years to come. All doors are available in natural wood grain finish.

STEEL WOOD EDGE DOORS

Perimetered with solid wood rails, laminated with PVC film steel plates and insulated with high density polyurethane or honeycomb core, these interior doors are built for use. They are humidity-proof, heat-insulated, crack-resistant, strong and non-deformable.

METPRO FIREPROOF DOORS

Both doors and frames are made from cold-rolled steel which is stronger and harder than ordinary steel. These doors are also insulated with fireproof material making them soundproof and heatproof to fire rating temp $\geq 950^{\circ}\text{C}$.

Even the hardware meets fireproof, integrity and insulation requirements. When it comes to fire, METPRO FIREPROOF DOORS can take the heat!
